

WATER DISPENSER WD- 1060 WBR SILVER With Refrigerator

Key Specifications

| Feature | Value |
|-----------------------------------|---|
| Model / Name | WD-1060 WBR Silver (With Refrigerator) Dawlance+2AYS Online+2 |
| Product Type | Top Load Water Dispenser (with mini refrigerator) Dawlance+2Dawlance+2 |
| Color / Finish | Silver Dawlance+2AYS Online+2 |
| Number of Taps | 3 Taps (Hot, Cold, Normal) Dawlance+2AYS Online+2 |
| Cold Tank Capacity | 3.5 litres Japan Electronics |
| Hot Tank Capacity | 1.6 litres Japan Electronics |
| Refrigerator Compartment Capacity | 20 litres Japan Electronics+1 |
| Refrigerant | R-134a Japan Electronics |
| Cooling Power | 95 W Japan Electronics |
| Heating Power | 400 W Japan Electronics |
| Effective Cold Water Volume | 1.5 litres Japan Electronics |
| Heating Rate / Capacity | ~ 5.2 litres/hour Japan Electronics |
| Cooling Rate / Capacity | ~ 2.4 litres/hour Japan Electronics |
| Cooling Time | ~ 90 minutes to reach cold state Japan Electronics |
| Control System | Mechanical (push / mechanical taps) Dawlance+2Dawlance+2 |
| Warranty (Compressor) | 3 years on compressor (some listings) Japan Electronics+1 |
| Price in Pakistan | ~ PKR 44,500 listed by Dawlance site for this model Dawlance Alternate listing ~ PKR 46,400 (sale list) AYS Online |

Features & Functional Highlights

- **Three-tap system (Hot / Normal / Cold)** — gives flexibility to use water at normal, chilled, or hot temperatures depending on need. [Dawlance+3Dawlance+3AYS Online+3](#)
 - **Built-in Mini Refrigerator** — a 20 L compartment to keep small items cool (milk, juice, bottled water) within the dispenser unit. [Japan Electronics+2AYS Online+2](#)
 - **Mechanical Controls** — simpler / more robust tap mechanisms using push / mechanical system rather than digital interface. [Dawlance+1](#)
 - **Stainless Steel / Quality Tank Material** — claimed in spec listings for durability and health safety. [Japan Electronics](#)
 - **Hot & Cold / Normal Mode** — the “Hot, Normal & Cold” faucet modes are explicitly mentioned in the product category. [Dawlance](#)
-

Strengths & Advantages

- Combines water dispensing (hot, cold, normal) with a small refrigerated compartment, saving space and giving convenience.
 - The 3-tap setup is more flexible than simpler 2-tap dispensers.
 - Mechanical taps often are easier to repair than electronic ones.
 - Good capacities: sizable cold and hot tanks relative to many dispensers as well as a 20 L fridge space.
 - Warranty on compressor (3 years) gives some assurance on cooling parts.
 - Many local retailers list it, so spare parts / service should be accessible in Pakistan.
-

Possible Limitations & Considerations

- The refrigerator compartment is small (20 L), so it's only for storing small items—not a full fridge replacement.
- Cooling power and “cold rate” (~ 2.4 L/hr) may be limited under heavy use or in high ambient temperatures.
- Heating power (400 W) might take time to heat full hot tank; in busy use, hot water may run out.
- Mechanical controls, while durable, lack digital features (timers, precise temp control).
- Ensure proper ventilation and avoid placing in direct sunlight or tight corners to allow cooling.
- Check construction quality (insulation, sealing) to ensure the fridge compartment doesn't warm up due to frequent use or high ambient.
