

MIST PEDESTAL FAN — Super Asia

1. General Information

- **Model / Name:** Mist Pedestal Fan — Super Asia
 - **Size / Blade Sweep:** 24 inches [superasiastore+2Appliances Zone+2](#)
 - **Price Range:** ~ Rs. 22,745 (Super Asia store), ~Rs. 29,900 in some retailers (price depends on location / stock) [superasiastore+1](#)
-

2. Physical / Build & Materials

- **Motor:** Heavy-duty triple-speed motor [superasiastore+1](#)
 - **Wire / Winding:** High grade pure copper wire used in motor winding [superasiastore+1](#)
 - **Sheet Material:** Imported silicon steel sheet used (for less energy loss, better efficiency) [superasiastore+1](#)
 - **Paint / Finish:** Long-lasting high gloss enamel paint, durable finish against wear & rust etc. [superasiastore+2Al Noor Trader+2](#)
-

3. Features & Performance

Feature	Description
Mist / Cool Breeze Function	The fan includes a cool breeze or mist-like function to help increase comfort, especially in hot, dry weather (“Mist” feature) superasiastore+1
Noiseless Operation	Designed to run quietly, to not disturb even in lower settings superasiastore+1
Low Voltage Performance	Works smoothly even when voltage is low — good stability under fluctuating supply superasiastore+2iShopping+2
Triple Speed	Offers at least 3 speed settings (Low / Medium / High) for different cooling needs superasiastore+2iShopping+2
Energy Efficiency	Claims of minimum power consumption thanks to efficient materials (steel sheet, copper wire) being used superasiastore+1
Tested Quality	Tested in computerized fan testing laboratory to check performance &

4. Dimensions, Weight & Other Specs

Specification	Value / Approximate
Blade Sweep / Size	24 inches superasiastore+2iShopping+2
Net Weight	~ 25-30 kg (some listings show “Weight 25-30 kg”) Al Noor Trader
Height / Stand Adjustability	Standard pedestal height (adjustable), though exact full extension not clearly listed in the sources I checked. —
Voltage / Frequency	Standard mains: 220-240 V, 50 Hz implied by the “works on low voltage” feature. superasiastore+2Appliances Zone+2

5. Additional Highlights & Considerations

- Because it has the “Mist / cool breeze” feature, it will provide more comfort than a plain pedestal fan in hot weather (especially if humidity is manageable).
- High-quality build (copper winding, steel parts, enamel paint) suggests better durability and longer life.
- Price is significantly higher than standard pedestal fans — partly due to its extra features.
- The weight is quite high, so moving it around might be less easy than lighter fans.
