

MWO DW-MD7 Heating Microwave Oven

Product Overview & Type

- It's marketed as a **Heating / Microwave Oven** (solo microwave type) — meant for reheating, cooking via microwave energy (no convection / grill in this model). [Dawlance+2Japan Electronics+2](#)
 - “Solo” / standalone microwave — no grill / convection features listed in spec sheets for this particular model. [Hadi Electronics+2Gulf Electronics+2](#)
 - It uses **mechanical / rotary controls** rather than a full digital touch panel. [MNS+3Japan Electronics+3alfalaelectronics.com+3](#)

Specifications

Parameter	Value / Description
Capacity	20 Liters Hadi Electronics+3Dawlance+3Japan Electronics+3
Microwave Power Output	700 W Hadi Electronics+3Japan Electronics+3electronica.pk+3
Power / Voltage	220-240 V, 50-60 Hz Japan Electronics+1
Control Panel / Interface	Mechanical / rotary knobs, manual interface electronica.pk+3Japan Electronics+3alfalaelectronics.com+3
Power / Cooking Levels	5 or 6 microwave power levels (some listings say 6) Daraz+4Hadi Electronics+4electronica.pk+4
Dimensions (approx)	One listing: width 439 mm, height 335 mm, depth 258 mm Shad Enterprises - Home Appliances Shop
Color / Finish	Black (some models / listings) Japan Electronics+3alfalaelectronics.com+3electronica.pk+3
Warranty	1-year brand warranty in many listings electronica.pk+2Daraz+2

Features & Practical Details

- **Mechanical / Rotary Control:** Simpler interface, typically more rugged and easier to repair in some cases.
- **Multiple Power Levels:** Adjustable to suit defrosting, reheating, lower power cooking etc.
- **Free-standing Design:** No built-in / flush mounting is indicated.
- **“Heating” / Reheating Function:** Its main job is heating / reheating rather than advanced cooking modes.

- **Speed / Defrost:** Some listings mention “speed defrost” functionality or fast reheat options. [Shad Enterprises - Home Appliances Shop+2MNS+2](#)

Strengths, Limitations & Considerations

Strengths / What It Suits

- Good choice for small / medium households needing a microwave primarily for reheating, defrosting, simple cooking.
- The simpler mechanical interface means fewer electronics to fail (compared to touch panels).
- Moderate capacity (20 L) is decent for everyday use without being overly large.

Limitations / Watch Outs

- No grill or convection mode (so you can’t grill / bake / crisp or brown in the same unit) — if you need grilling or convection, you’ll need a different model.
- Power 700 W might be lower than higher end microwaves (some go 900W or more) — so heavier items might take more time.
- Noise, internal light, turntable diameter, and internal cavity finish are not clearly listed — these can affect usability.
- As with any appliance, actual performance depends on how well it is installed (ventilation, spacing) and how well the internal magnetron / components are maintained.
-
